

PORATABLE APPARATUS USER INTERFACE

ABSTRACT OF THE DISCLSOSURE

5

The portable electronic apparatus includes a housing (202) having a keypad (206), a rotary input device (204), a display (208), a navigation input device (210), and a speaker (212). The display is located in-between the rotary input device and the navigation input device. The speaker is disposed inside or adjacent to the navigation
10 input device. An audio passage (228) is adjacent to or extending through the navigation input device and adjacent to the speaker. The apparatus can be configured in a substantially horizontal configuration (200) or a substantially vertical configuration (400). The information presented on the display changes orientation depending on the configuration of the apparatus.
